

PRINCECASTLE™

2018 Standard Product Catalog and Suggested Price List

Making food taste great... **it's what we do.**

Prince Castle is a global foodservice equipment manufacturer that specializes in developing quality products to the world's premier restaurant operators. Founded in 1955, Prince Castle has remained dedicated to helping the world's leading restaurant brands improve restaurant operations so they can consistently serve a great-tasting product quickly and safely. Understanding the tight relationship between operational execution and product menu, Prince Castle develops kitchen equipment that optimizes both. Prince Castle's parent company, Marmon Food, Beverage & Water Technologies Company, supports the global foodservice industry for restaurants, hotels, cafeterias, and other commercial and institutional environments. Marmon is part of Berkshire Hathaway Inc.

Prince Castle's Contact Toasters are a great choice for toasting buns for burgers and sandwiches. Our contact toasters deliver higher toasting capacities while maintaining proven, reliable design. A stronger motor and higher temperature platen increase performance, which caramelizes the bread, forming a coating that protects the bread from the juices and condiments that can cause soggy, unattractive bread. Adjustable bun crush controls and thermostat allow for precise toasting for various bread products.

CONTACT GRILLS

Prince Castle contact grills are available in single or dual lid configurations with smooth or grooved surface options. Heavy duty in-cast platens offer independent control of both top and bottom surfaces, allowing for consistent grilling and heat penetration throughout the product. Features include:

- Split top or single lid design allow efficient grilling of a wide variety of products including tortillas, sandwiches and chicken breasts.
- “Floating gap” design allows many products of varying thicknesses to be grilled.
- Adjustable stops (0”, 3/4”, 1”, 1-1/4”) to prevent over compression of product.
- Solid state controls provide accurate temperature control.
- 14” cooking surface width.
- Cooking surface temperature range = 250°F (79°C) to 550°F (302°C).
- Durable stainless steel construction with integrated four channel electronic, programmable timer/alarm (for each lid) to accurately track product grill times.
- Easy to clean - grease drawer is accessible from front.

DEDICATED HOLDING BINS

Hold cooked products longer, better and safer while improving speed of service and reducing food waste! Prince Castle DHBs are an integral part of QSR work-in-process operations in which menu items are prepared to order on demand.

Specifically designed to hold individual menu item components, virtually any fried, grilled or baked food product can be held for an extended period of time and at an improved quality level compared to heat lamps, steam tables or other traditional point of use holding methods.

Prince Castle DHBs also include MenuTrak timer bars that offer operators the ability to “supervise” held products by assigning where menu item components are located and monitoring hold times. Prince Castle’s MenuTrak technology also provides improved speed of service and product consistency, with added built-in programmable features that alert operators when to cook new product and replace existing held product.

Hold cooked products longer, better and safer while improving speed of service and reducing food waste!

Prince Castle DHBs are an integral part of QSR work-in-process operations in which menu items are prepared to order on demand.

Specifically designed to hold individual menu item components, virtually any fried, grilled or baked food product can be held for an extended period of time and at an improved quality level compared to heat lamps, steam tables or other traditional point of use holding methods.

Prince Castle DHBs also include MenuTrak timer bars that offer operators the ability to “supervise” held products by assigning where menu item components are located and monitoring hold times. Prince Castle’s MenuTrak technology also provides improved speed of service and product consistency, with added built-in programmable features that alert operators when to cook new product and replace existing held product.

What Is MenuTrak?

- MenuTrak manages your menu items’ locations and hold times. It also instructs the crew which pan to use, and when to discard or cook more food.
- Alphanumeric displays for each pan identify where menu items are located and track their respective hold times.
- Displays alert you when to use, discard or cook more product.
- Stores up to 6 different menus, so you can easily switch between breakfast, lunch, dinner, late night or other menus.
- MenuTrak comes pre-programmed with a standard library of menu items, while offering the flexibility to add your own specific menu items and customize their holding times.
- With MenuTrak, Prince Castle DHBs are reliable, easy to use/maintain, and are backed by a one year parts and labor warranty.

UNDERSTANDING MODEL NUMBERS

Ideal Users

Perfect for operations that Make-To-Order their sandwiches and other menu items, including:

- Quick-service restaurants
- Specialty shops
- Schools and other institutions
- Hotels
- Almost any operation looking to hold individual menu item components longer and to a higher quality

Holds the following fried and non-fried food for 1-hour

- Hamburgers
- Grilled Chicken
- Fried Chicken
- Fried Appetizers
- Fish
- Eggs
- Pizza
- And much, much more!!!

Prince Castle's latest holding innovation provides operators the greatest flexibility in menu variety and kitchen design. Modular individually heated cabinets controlled by a master base allow the system to expand horizontally and vertically, distributing power and communication while maintaining desirable serving temperatures. Modular cabinets can be configured and expanded as your business grows, controlling safe, even and consistent heating, ensuring customers are always being served the highest quality meals.
