

Operational efficiencies and great-tasting burgers.

The new Prince Castle® Flame King Broiler features a four-lane continuous feed that averages a whopping 85 burgers per lane/hour. Turn up your turnout with consistent quality burgers that deliver that “true char” flavor thanks to the independently controlled top and bottom infrared burners. From its patented patty slide, auto-loading patty staging area, and minimal parts, this broiler maximizes output, reduces costs, and streamlines daily maintenance.

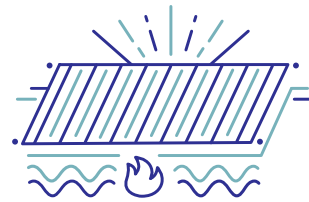

- Independently controlled infrared and tube burners
- Automatically feed any sized patty from stack
- Patented, cost-saving patty slide
- Split-loader design allows operators to cook even during routine maintenance

Deliver the authentic “true char” flavor customers love with the Prince Castle Flame King Broiler. It delivers **optimized IR burner control along with easily removable components** helping your crew deliver consistent, great-tasting food with a simple-to-clean operation.

Four-Lane Continuous Feed

Cook any sized patty in any lane with this versatile broiler that **averages up to 85 burgers per lane/hour**. It also includes an automated split-loader staging area that can hold up to 36 frozen products.

Infrared Burner Technology

Maintenance-free, IR burners provide **consistent heating to deliver improved product quality** while maintaining the “true char” flavor consumers love.

LED Touchscreen Display

The handy LED display enables quick adjustments when needed and **simple menu navigation to ease crew engagement**.

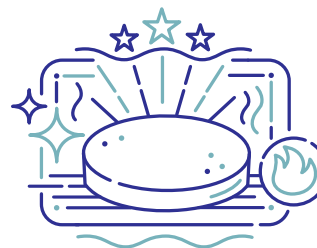

No Release Sheets

Patent-pending slide design eliminates costly consumable release sheets.

Crew-Proof Cleaning

The removable staging area, guided patty slider, modular landing zone with a removable drip-tray base pan, and a robust wire rack, make cleaning easy.

Juice Management System

Our unique broiler design holds the patties in their natural juices, delivering hotter burgers with superior quality and taste.
